

2023 Country Survey on 10 Point Action Plan (2025 Global HIV Prevention Roadmap)

Orientation meeting of new GPC countries

Lycias Zembe

Global HIV Prevention Coalition, UNAIDS, Geneva

NAC Managers Meeting

24 October 2023

Monitoring progress in implementing the 2025 HIV Prevention Road Map

1

Data, both quantitative and qualitative, from various sources, predominantly GAM – program output, outcomes, and impact indicators

2

Country-reported responses (subjective) based on a survey questionnaire covering the 10 Roadmap actions – multiple choice and few text-based questions

- The structure followed the 10 Roadmap 2025 actions and attempts to capture all the pillars where relevant
- Each section attempts to drill down on specific roadmap actions in line with the milestones in the Roadmap document

Why is a Road Map survey conducted?

- provides a *systematic* way to assess the implementation of key actions in the 2025 HIV Prevention Road Map.

Document where countries are in relation to the 10-Point Action Plan of the 2025 HIV Prevention Road Map

Highlighting where progress has been made and identify remaining gaps

The GPC is also a platform for cross-learning; compiled survey results allow comparability across countries

How the survey was conducted

- The survey was shared with countries between 9 - 28 March 2023
 - 28 GPC focus countries + 6 “new” countries
- Recipients in each country included:
 - UNAIDS Country Directors,
 - UNAIDS HIV prevention focal points,
 - UNFPA representatives,
 - UNFPA HIV prevention focal points,
 - National AIDS Commission Directors and their HIV prevention focal points,
 - Ministry of Health HIV Prevention Focals points,
 - UNAIDS RST Directors and their HIV Prevention Focal points
- One response per country compiled by the HIV prevention TWG under the leadership of the National AIDS Councils or National AIDS Control Program or the prevention leadership entity.
- Responses were received by the GPC Secretariat Team between 15 March and 12 May 2023
- All results are verified by government programs before analysis and dissemination

Countries response rates and data analyses

Complete submissions

Angola	Democratic Republic of the Congo	Iran	Myanmar	South Africa
Botswana	Egypt	Kenya	Namibia	South Sudan
Brazil	eSwatini	Lesotho	Nigeria	Uganda
Cameroon	Ethiopia	Madagascar	Pakistan	Ukraine
China	Ghana	Malawi	Peru	United Republic of Tanzania
Colombia	India	Mexico	Philippines	Zambia
Côte d'Ivoire	Indonesia	Mozambique	Rwanda	Zimbabwe

Analysis was done on N = 35/35 countries done

Data analysis methodology

Overall Roadmap actions scoring matrix

Action 1 - Conduct a data-driven assessment of HIV prevention programme needs and barriers

Question number (in the questionnaire)	Components considered for scoring	Scoring	Comments
1.1	> HIV prevention response epidemic patterns analysis	> 0.5 (different proportion of the 0.5 based on the level of analysis)	All subnational > 0.5, some subnational > 0.4, national > 0.3
1.2	> Consultation meetings to identify barriers conducted	> 0.25	
	> Listing of the identified barriers	> 0.25	

Action 2 - Adopt a precision prevention approach focused on the key and priority populations to develop national HIV prevention goals aligned 2025 targets

Question number (in the questionnaire)	Components considered for scoring	Scoring	Comments
2.1	> Developed a prevention Roadmap or strategy or plan	> 0.5	
2.2	> Set granular HIV prevention targets	> 0.2	
2.3	> Translate national targets to subnational targets	> 0.6	
2.4	> Differentiated HIV prevention packages	> 0.8	
2.5	> Packages for AGYW where relevant	> 0.8	
2.7	> SOPs or implementation guides in place for relevant pillars	> 0.8	
			2.5 where not applicable the country gets the score

Action 3 - Define country investment needs for an adequately scaled HIV prevention response and ensure sustainable financing

Question number (in the questionnaire)	Components considered for scoring	Scoring	Comments
3.1	> Budget/costed HIV prevention plan developed	> 0.6	
3.2	> Dialogue to address HIV prevention funding gap	> 0.4	

Action 4 - Reinforce HIV prevention leadership entities for multisectoral collaboration, oversight, and management of prevention responses

Question number (in the questionnaire)	Components considered for scoring	Scoring	Comments
4.1	> Multi-sector HIV prevention leadership exist	> 0.5	If meeting was done two or more times > 0.3, if they met only once > 0.15, if they never met >0
4.2	> The entity is functional shown by meetings held	> 0.3	
4.3	> Milestones developed to reinforce HIV prevention leadership entities	> 0.2	

Action 5 - Strengthen and expand community-led HIV prevention services and set up social contracting mechanisms

Question number (in the questionnaire)	Components considered for scoring	Scoring	Comments
5.1	> Government convening of communities of KPs, young people, implementing partners and funders	> 0.2	If laws are in place > 0 and if not > 0.2
5.2	> Public funds being allocated to NGOs and community-led services	> 0.2	
5.3	> Any laws or policies impacting community organisations	> 0.2	
5.4	> Any targets set to increase proportion of services delivered by community-led organisations	> 0.2	
5.5	> Have milestones been developed to strengthen and expand community-led prevention services	> 0.2	

Action 6 - Remove social and legal barriers to HIV prevention services for key and priority populations

Question number (in the questionnaire)	Components considered for scoring	Scoring	Comments
6.1	> Does the HIV prevention strategy clearly identify and prioritize addressing of legal, policy and structural barriers	>0.6	
6.2	> Milestones to address the barriers	> 0.4	

Action 7 - Promote integration of HIV prevention into essential related services to improve HIV outcomes

Question number (in the questionnaire)	Components considered for scoring	Scoring	Comments
7.1	> Are HIV prevention service integration milestone developed	>0.7	
7.1.1	> Are the milestones listed	>0.3	10% for each additional milestone

Action 8 - Institute mechanisms for rapid introduction of new HIV prevention technologies and programme innovations

Question number (in the questionnaire)	Components considered for scoring	Scoring	Comments
8.1	> Defined specific actions to introduce new HIV prevention technologies	> 0.6	
8.2	> Are milestone developed and listed for introduction of new prevention technologies	> 0.4	

Action 9 - Establish real-time HIV prevention programme monitoring systems with regular reporting

Question number (in the questionnaire)	Components considered for scoring	Scoring	Comments
9.1	> Has the country done a data triangulation to determine coverage of programmes	> 0.4	
9.3	> Developed subnational Scorecards?	> 0.1	
9.4	> HIV prevention funding expenditure analysis done?	> 0.4	
9.5	> Cost-effectiveness incorporated into national prevention program reviews	> 0.1	

Action 10 - Strengthen accountability of all stakeholders for progress in HIV prevention

Question number (in the questionnaire)	Components considered for scoring	Scoring	Comments
10.1	> Accountability (Table3) of the 2025 HIV Prevention Roadmap followed	> 0.1 for each of the 8 answers	
10.2	> Country developed an Accountability Framework in line with 2025 HIV Prevention Roadmap	> 0.2 for yes developed and > 0.1 being developed	

Baseline survey results

Roadmap actions survey results summary

Road Map Survey Response Scoring

Road Map Action 2. Adopt a precision prevention approach to develop national HIV prevention Goals and aligned 2025 targets

- A thorough scoring method was used that considered all the different parts of a Road Map Action, as suggested in the 2025 HIV Prevention Road Map.
- This helps to identify the precise gap among aspects of a Road Map Action that a country may require assistance to address.

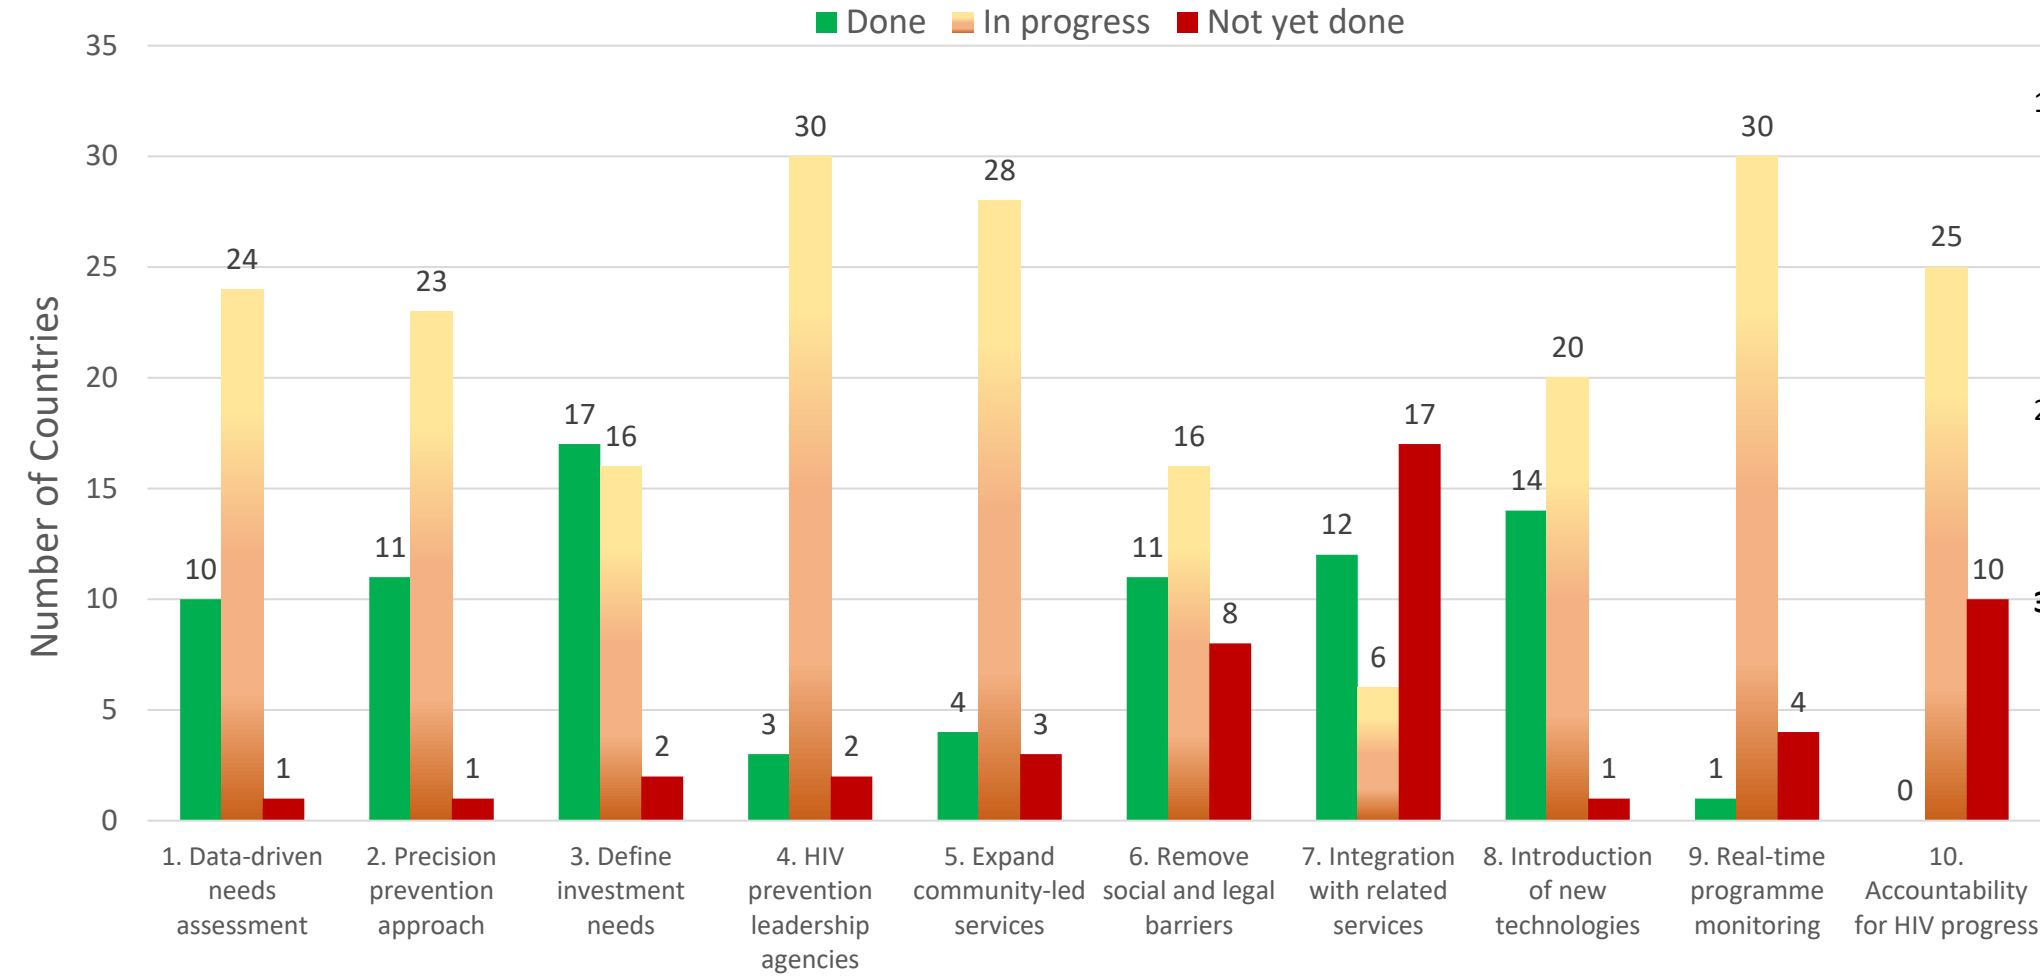

Q#	Road map action component being assessed	Score	Lesotho	Uganda	South Africa
2.1	> developed a prevention Road map or plan	-> 0.5	0.5	0.5	0
2.2	> Set granular HIV prevention targets	-> 0.2	0.2	0	0.2
2.3	> Translate national targets to subnational targets	-> 0.06	0.06	0	0.06
2.4	> Differentiated HIV prevention packages	-> 0.08	0	0.08	0
2.5	> Packages for AGYW where relevant	-> 0.08	0.08	0.08	0.08
2.7	> SOPs or implementation guides in place for relevant pillars	-> 0.08	0.08	0.08	0.08
Overall score		1.0	0.9	0.7	0.5

2025 HIV Prevention Road Map Action	Question number (in the survey questionnaire)	Road Map Baseline Survey components considered for overall Road Map Action scoring	Rwanda	Madagascar	Colombia	South Sudan	Peru	Egypt
1. Data-driven needs assessment	1.1	> HIV prev response epidemic patterns analysis						
	1.2	> Consultation meetings to identify barriers						
		> Listing of the identified barriers						
	Over all score							
2. Precision prevention approach	2.1	> developed a prevention Road Map or plan						
	2.2	> Set granular HIV prevention targets						
	2.3	> Translate national targets to subnational targets						
	2.4	> Differentiated HIV prevention packages						
	2.5	> Packages for AGYW where relevant						
	2.7	> SOPs or implementation guides in place for relevant pillars						
	Over all score							
3. Define investment needs	3.1	> Budget/costed HIV prevention plan						
	3.2	> Dialogue to address prevention funding gap						
	Over all score							
4. HIV prevention leadership agencies	4.1	>Multi-sector HIV prevention leadership exist						
	4.2	>The entity is functional shown by meetings held						
	4.3	>Milestones developed to reinforce HIV prevention leadership entities						
	Over all score							
5. Expand community-led services	5.1	>government convening of relevant communities						
	5.2	>Public funds being allocated to NGOs						
	5.3	>Any laws or policies impacting NGOs						
	5.4	>Any targets set on community-led services						
	5.5	>Milestones on community-led services						
	Over all score							
6. Remove social and legal barriers	6.1	>Legal, policy and strutural barriers in strategy						
	6.2	>Milestone to address the barriers						
	Over all score							
7. Integration with related services	7.1	>Integration milestone developed						
	7.1.1	>Are the milestones listed						
	Over all score							
8. Introduction of new technologies	8.1	>Actions for new prevention technologies						
	8.1.1	>Milestone on new prevention technologies						
	Over all score							
9. Real-time programme monitoring	9.1	>Data triangulationfor coverage of programmes						
	9.3	>Developed subnational Scorecards?						
	9.4	>HIV prevention funding expenditure analysis done?						
	9.5	>Cost-effectiveness in programe reviews						
	Over all score							
10. Accountability for HIV progress	10.1	>Table3 of the 2025 Road Map followed						
	10.2	>Accountability framework in line with Road Map						
	Over all score							

Progress on completion on each Road map Action by GPC countries

1. In 2023, more countries are **using data, adopting people centered planning** for prevention and **defining investment needs**. More countries are also preparing the ground for **new prevention technologies**
2. Note nearly enough is being done on **service integration**, having an **accountability framework**, or **removing social and legal barriers**
3. **National institutions to lead** coordinated HIV prevention programs, **Community led service delivery** and **Prevention program monitoring** systems are works in progress / areas for intensified support
