

Launch of the Global HIV Prevention Coalition report

HIV Prevention: Between Crisis and Opportunity - a summary of the key findings from 2023 Global HIV Prevention Coalition Scorecards

 13 March 2024

 15:00 – 16:00 GVA time

 Zoom Webinar

Launching the GPC report, with less than two years left to reach the 2025 mark in the response, gives a clear picture of progress made in advancing HIV prevention efforts; identify what is working well and what needs to be done differently – the urgency cannot be overemphasized. This report provides a summary of the scorecard findings for the 40 GPC Countries, progress made in the implementation of the 2025 HIV Prevention Roadmap and key messages on HIV prevention for stakeholders to leverage whilst in critical engagements such as the ongoing sustainability discussions this year. Therefore, this webinar will bring together all stakeholders within the GPC and beyond, to unpack the report findings.
