#### **Thematic area**

**Outcome**

**Thematic area**

**Indicator**

- **Population size estimate for female sex workers in 1000s**
- **% of all sex workers who received at least two HIV prevention interventions in the past three months**
- **% of sex workers who avoided health care because of stigma and discrimination**
- **Prevention strategy includes core elements of SW prevention package**
- **Criminalization of sex work**
- **Prevention strategy includes core elements of MSM prevention package**
- **Criminalization of same-sex sexual acts**
- **Prevention strategy includes core elements of PWID harm reduction package**
- **Condom use of sex workers with most recent client, % (interviews with women)**
- **Condom use at last anal sex among MSM (%)**
- **Condom use among transgender people (%)**
- **Condom use at last paid sex act, % (categorized by men)**
- **% of PWID on ART – sex work**
- **% of PWID on ART – people who inject drugs**
- **Women around where ARVs are available**
- **% of PLHIV on ART – sex workers**
- **% of PLHIV on ART – people who inject drugs**
- **% of people who inject drugs who used health care because of stigma and discrimination**
- **Prevention strategy includes core elements of PWID harm reduction package**
- **Criminalization of drug use/consumption or possession for personal use**
- **Prevention strategy includes core elements of PWID prevention package**

**Note:**

- ART data reported can either be from surveys or programmes, and the latter usually give higher values. This limits comparability across countries.
- The population size estimates reported can either be nationally representative or only for regions within the country where data is available. This limits comparability across countries.

**Data sources for key population program coverage:** Global AIDS Monitoring 2022, Global Fund and PEPFAR reports obtained in 2022
