Men Along the Last Mile: Targeting VMMC Services by Location and Population to Reach Saturation

June 21, 2018

Background

- 2018 PEPFAR Country Operational Plan and recent population-based surveys have highlighted the need to target services for impact
 - Leverage existing data and resources to achieve saturation in subnational units
 - Continue to support age pivot to accelerate incidence rate reductions

Today's objectives

- Summarize existing resources for estimating MC coverage and impact
- Review promising service targeting approaches from Zimbabwe and Malawi
- Discuss participants' current approaches, best practices, and challenges in monitoring MC coverage and impact

Agenda

Introduction

Catey Laube, Jhpiego

Part 1: Targeting VMMC for Impact

Implications from PHIA data

Carlos Toledo, CDC

Q&A

Part 2: Reaching Men Aged 20+ Years

Zimbabwe

Lewis Masimba, I-TECH Zimbabwe

Q&A

Malawi

Geoffrey Menego, Jhpiego Malawi

Provider Verbal Pre-Screening Questions for Voluntary Medical Male Circumcision

INSTRUCTIONS TO PROVIDERS:

- These questions are intended to identify conditions that may not be apparent through physical screening but could still compromise the safety of VMMC.
- Please verbally ask the following questions **in addition** to performing physical screening of **all** voluntary medical male circumcision (VMMC) clients prior to performing circumcision, regardless of the circumcision method to be used.
- Questions should be asked even if a client or their guardian already completed a written form with similar information.
- If a client answers "Yes" to any of the full questions below, please follow site policies or consult the senior on-site clinician to determine whether any further testing or referral to a specialized provider is needed before circumcision.

*Check if answer is YES –
Consider further screening*

1. Do you have any current or past conditions, or a chronic illness that we should be aware of?
2. Are you currently taking any medications or vitamins? If yes, please list them. *(Consider further screening if client cites medications other than over-the-counter analgesics)*
3. Are you allergic to any medicines?
