Global Men and HIV Technical Working Group (MENHT)

March 24, 2021

Global HIV data shows that Men living with HIV are less likely than women to know their status, less likely to initiate ART, less likely to remain engaged in care, and less likely also to be virally suppressed

Launch of the Men and HIV Global Technical Working Group (MENHT)

Draft Agenda

1. Welcome, introductions and terms of reference for MENHT – Wole Ameyan, **WHO**
2. Policy brief on Men's testing and upcoming work – Muhammad Jamil and Syed Afsar, **WHO**
3. Enhancing VMMC uptake among men – call for case studies. Stephanie Davis, **Consultant, WHO**
4. IAS 2021 updates – Anna Grimsrud, **IAS, Switzerland**
5. Upcoming events and webinars – Lycias Zembe, **UNAIDS**
6. Updates from members (work and events) - ALL
7. Closing and next steps – Lycias Zembe, **UNAIDS**

24 march 2021

14:00 - 15:30

MENHT Virtual Launch - Zoom Link
Meeting ID: 947 2670 5428 | Passcode: 126825

- To **coordinate** activities related to improving outcomes for men across HIV cascade and support advocacy efforts with global partners and key stakeholders
- To **support development** of operational **guidance** for improving HIV services for men including identifying interventions and review of technical documents
- Identify, collect and **share best practices**, case example and tools for reaching men
- For **dissemination** of **guidance**, briefs and **lessons learned** and support scale up of effective interventions including providing technical assistance

About MENHT

A standing body of stakeholders and partners to support global and country engagement and galvanize action to mitigate the men gap

Global HIV data shows that Men living with HIV are less likely to know their HIV status, initiate antiretroviral therapy, remain engaged in care and be virally suppressed compared to women

The Global Men and HIV Technical Working Group (MENHT) Webinar Series - Episode #3
