

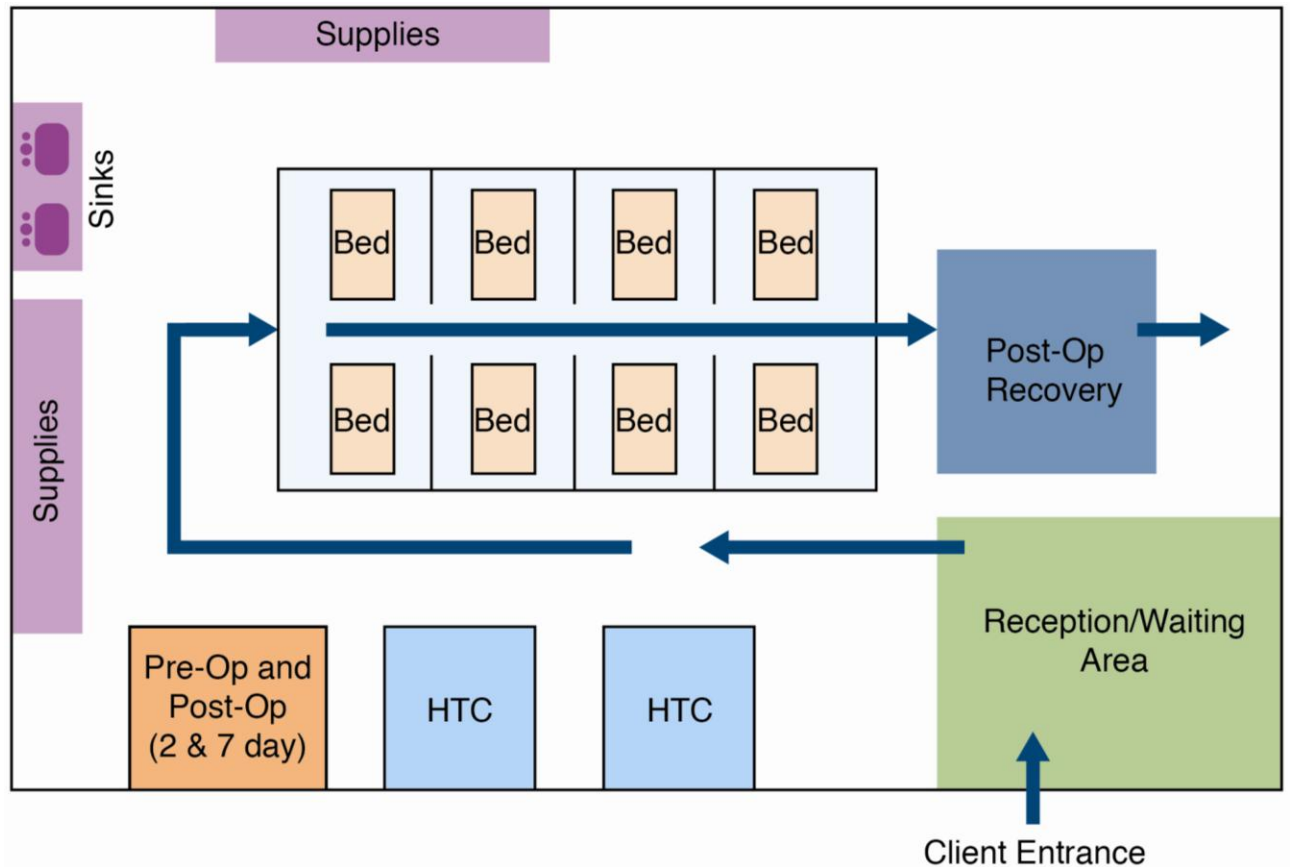

Figure 4: VMMC Client Flow Diagram

A possible large fixed clinic site configuration that optimizes client flow

Note the client flow is unidirectional.

Tips for Organizing Facility Space for VMMC services

- Client flow should be unidirectional.
- Recovery space should accommodate more clients than surgical space. Because recovery time can be longer than procedure time, bottlenecks can occur if recovery space is inadequate.
- If space permits, client follow-up reviews should be conducted in an area that is separate from surgical areas. Separating the two areas will simplify client flow and reduce stress to staff.
