Pass code: 76045

**PLEASE MUTE YOUR
PHONE FOR THE
ENTIRE WEBINAR**

- If you are unable to access the chat box and have a question for presenters, please email your question to tara.devezin@jhpiego.org

Agenda

1. Project IQ orientation & updates

Stephanie Davis &
Carlos Toledo, CDC

2. DREAMS and VMMC

Janet Saul &
Jessie Gleckel, CDC

3. Country perspective: Uganda

Sheila Kyobutungi, USAID

Q&A and discussion

5. Country perspective: Mozambique

Ana Baptista &
Meheub Mahomed, Jhpiego

Q&A and discussion

Improving Quality VMMC

Project IQ Orientation & Updates

Carlos Toledo & Stephanie Davis

U.S. Centers for Disease Control and Prevention

December 15, 2016

Project IQ

- Project IQ: “Technical Assistance to Provide High-Quality VMMC Services to Programs Supported by PEPFAR”
- CDC headquarters mechanism which field offices can also put COP funds into for country-specific specific quality activities
- Project period: April 1, 2015 – March 31, 2020

Project IQ: Goal & Objectives

- Provide comprehensive global TA to support safe, high quality VMMC programs:
 - Integrate standards and indicators within national systems
 - Standardize quality approaches
 - Improve timeliness, accessibility, actionability, and quality of VMMC data
 - Build local capacity to implement QA and CQI
 - Evaluate effectiveness of QA/CQI in improving quality of VMMC services

Project IQ: Scope of Activities

Tool digitization

CQI design and implementation

Technical assistance

Service delivery support

Knowledge exchange

Webinars

- Purpose: Convene USG VMMC field staff and implementing partners, and other key stakeholders including Ministries of Health to discuss essential topics for maintaining and improving the quality of VMMC services.
- Join Project IQ mailing list, write Tara.Devezin@jhpiego.org

Improving Quality VMMC

Provider Verbal Pre-Screening Questions for Voluntary Medical Male Circumcision

INSTRUCTIONS TO PROVIDERS:

- These questions are intended to identify conditions that may not be apparent through physical screening but could still compromise the safety of VMMC.
- Please verbally ask the following questions **in addition** to performing physical screening of **all** voluntary medical male circumcision (VMMC) clients prior to performing circumcision, regardless of the circumcision method to be used.
- Questions should be asked even if a client or their guardian already completed a written form with similar information.
- If a client answers "Yes" to any of the full questions below, please follow site policies or consult the senior on-site clinician to determine whether any further testing or referral to a specialized provider is needed before circumcision.

*Check if answer is YES –
Consider further screening*

1. Do you have any current or past conditions, or a chronic illness that we should be aware of?
2. Are you currently taking any medications or vitamins? If yes, please list them. *(Consider further screening if client cites medications other than over-the-counter analgesics)*
3. Are you allergic to any medicines?

A Healthy Obsession with Safety:
Improving Programs through
Management and Reporting of
Adverse Events

Improving Quality VMMC

3 Questions for Safe Injections

- Did you wash your hands?
- Are you using a new needle and syringe EVERY TIME you access a vial?
- Is there any possibility that the vial is contaminated, spoiled, or expired?

Improving Quality VMMC

Managing Adverse Events of Voluntary Medical Male Circumcision (VMMC)

An orientation for
non-VMMC providers

**Injection Safety For
VMMC Service
Delivery**

Now available: training modules

Managing Adverse Events of Voluntary Medical Male Circumcision (VMMC)

An orientation for non-VMMC providers

About: A tool for VMMC teams to orient non-VMMC providers to surgical and device-based VMMC healing, AEs, basic AE management, criteria for referral to specialists/higher level of care, and AE reporting.

Email Tara.Devezin@jhpiego.org

About: Familiarizes participants with vital injection safety practices specific to VMMC, to ensure programs prevent provider actions that could create risk of client and healthcare provider exposure to these infections.
