

Closing

Wole Ameyan, WHO HQ

Final musings - Think Men, think diverse

- Understand the ‘**variety**’ in men and implications to SD
- Think men, think **heterogeneous**.
- Think men, think **differentiated**.
- Think men, **challenge stereotypical thinking**

Poor health seekers or poor health services

- Men do seek health services.
- Question is, are health systems designed to receive men?

Think men, think context

- Think men, think **local**. The best solutions are local. One size does not fit all
- Think men, think **evolving**, think varied approaches and opportunities.

Think men, think ending AIDS

- Think men, think **partnerships**
- Think men, think **inclusion** and **implementation**
- Think men, think **ALL** men.

Planned MENHT Webinar Series Episodes

2022 – 18 May 2022

2022 – 14 September 2022

2022 – 07 December 2022

Thank you all for joining!

WEBINAR BROUGHT TO YOU BY:

Global HIV data shows that Men living with HIV are less likely than women to know their status, less likely to initiate ART, less likely to remain engaged in care, and less likely also to be virally suppressed

The Global Men and HIV Technical Working Group (MENHT)

Webinar Series - Episode #1
