New HIV infections among adults aged 15+

**Note:** 2019 HIV estimates presented are for the year 2018. Other data points may refer to various years when surveys were conducted.

Data sources: UNAIDS 2019 HIV estimates; Global AIDS Monitoring 2019; Global Prevention Coalition Progress Survey 2019; ICF - The DHS Program STATcompiler; SRH/HIV Linkages Index.

### THE STATE OF PREVENTION

**IN ANGOLA 2019**

**ARV-BASED INTERVENTION**

**GLOBAL TARGET** 75%

**NEW HIV INFECTIONS**

- Adults 15+<br> 7%
- Young women 15-24<br> 7%

**HIV PREVALENCE AMONG YOUNG PEOPLE (%)**

#### ADOLESCENT GIRLS, YOUNG WOMEN & MALE PARTNERS

- Condom use with a non-regular partner among young people (%)
  - 33 young women, 72 young men (Target: 95%)

#### SEX WORKERS

- Condom use at last paid sex (%)
  - 59 (Target: 95%)

#### GAY MEN & OTHER MEN WHO HAVE SEX WITH MEN

- Condom use at last anal sex (%)
  - 29 women, 53 men (Target: 95%)

### WORLDWIDE TARGETS (per 100,000)

#### PRE-EXPOSURE PROPHYLAXIS

- Number of people living with HIV who received pre-exposure prophylaxis at least once during the past 12 months
  - Insufficient Data

### NEXT STEPS:

- Advocate scaling up the financing of prevention.
- Advocate for key populations services for prevention.
- Develop provincial plans for prevention packages.
- Develop national packages for key populations.
- Develop an HIV prevention programme for young women using a location-population approach.
- Update the leaders and focal points of civil society organizations on prevention packages.
- Monitor prevention progress of provincial strategic plans.
