New HIV infections among adults aged 15+

14% decline, which is too slow to achieve the 2020 targets. Integrated programme scale-up is needed.

**New HIV infections**

**HIV prevalence among young people (%)**

- Young women 15-24: 2019 target achieved
- Male circumcision uptake: 15-24: Insufficient data
- Voluntary medical male circumcision: 15-24: Insufficient data
- Pre-exposure prophylaxis: People living with HIV: 15%

**Estimated HIV prevention financing and gaps**

**Enablers & systems**

- Avoided health care due to stigma & discrimination
- Sexual and reproductive health and rights strategy level of HIV linkages

**Status of 10 Roadmap actions**

- Baseline 2018
- 2019: Done, Partially done, Not done

**NEXT STEPS:**

- Develop a consolidated capacity-building and technical assistance plan.
- Convene national social contracting dialogue sessions.
- Convene a national symposium on HIV prevention financing.
