  - 2011–13: Insufficient data
  - 2014–17: 10%

**Estimated HIV Prevention Financing Gaps**

-gay men and other men who have sex with men
-people who inject drugs
-transgender people
-Pre-exposure prophylaxis

**Status of 10 Roadmap Actions**

- Address all implementation challenges for carrying out comprehensive prevention services for key populations.
- Monitor the application of the National Guidelines for a Comprehensive HIV Prevention Program among key populations in Pakistan, and provide the necessary technical support to key implementers (where needed).
- Initiate a financing dialogue with key officials of the provincial governments of Sindh and Punjab to mobilize provincial resources for prevention programmes for key populations.
- Ensure the inclusion of a session on the value of treatment as prevention in all training for health-care providers.
