

THE STATE OF PREVENTION IN THE UNITED REPUBLIC OF TANZANIA 2019

New HIV infections among adults aged 15+

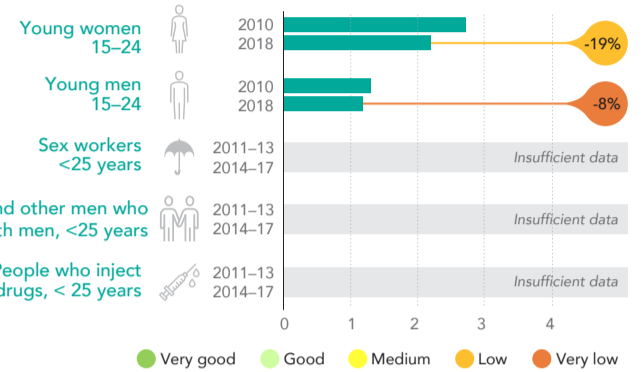

New HIV infections among adults declined by **13%** which is too slow to achieve the 2020 targets. Programme scale-up is needed.

New HIV infections

HIV prevalence among young people (%)

ADOLESCENT GIRLS, YOUNG WOMEN & MALE PARTNERS

Condom use with a non-regular partner among young people (%)

Young women: 30% (Target: 90%)
Young men: 34% (Target: 90%)

19% of priority locations have adolescent girls, young women programs.

Country messages: Improve and scale up youth-friendly health services (biomedical, behavioural and structural interventions).

Score: 2

SEX WORKERS

Condom use at last paid sex (%)

Sex workers: 70% (Target: 95%)
Clients: 70% (Target: 95%)

Insufficient data

Country messages: Improve access and availability, and promote the consistent and correct use of male and female condoms and Pre-exposure services.

Score: Insufficient data

GAY MEN & OTHER MEN WHO HAVE SEX WITH MEN

Condom use at last anal sex (%)

Men who have sex with men: 14% (Target: 90%)

28% received two interventions in past 3 months.

Country messages: Scale up access and availability of condom and Pre-exposure services for gay men and other men who have sex with men.

Score: 2

PEOPLE WHO INJECT DRUGS

Condom use with a non-regular partner

With safe injections: 84% (Target: 95%)
On OST: 21% (Target: 40%)

28% received two interventions in past 3 months.

Country messages: Scale up harm reduction services (such as medication-assisted treatment, opioid substitution therapy and condoms).

Score: 4

CONDOMS

Condom use with a non-regular partner

Women 15-49: 51% (Target: 90%)
Men 15-49: 60% (Target: 90%)

15% condom distribution need met.

Country messages: Strengthen stewardship and support a total market approach to ensure that everyone who needs a condom can find a source of supply.

Score: 4

VOLUNTARY MEDICAL MALE CIRCUMCISION

Uptake of voluntary medical male circumcision

by 2020: 84% (Target: 90%)
by 2019: 82% (Target: 90%)
by 2018: 82% (Target: 90%)
by 2017: 82% (Target: 90%)

100% annual voluntary medical male circumcision target achieved.

Country messages: Integrate Voluntary Medical Male Circumcision target into core medical services to ensure sustainability, and include early infant medical circumcision (EIMC).

Score: 10

PRE-EXPOSURE PROPHYLAXIS

8000 Number of people who used oral Pre-exposure at least once during the past 12 months.

6 composite Pre-exposure preparedness score (0-10).

Country messages: Scale up the identification of people living with HIV, linkages to care and treatment adherence.

Score: 6

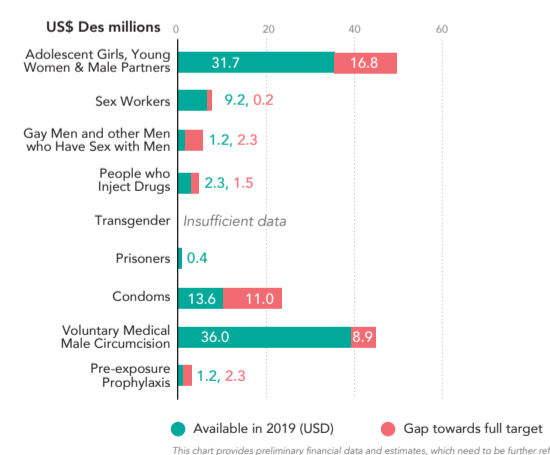

ANTIRETROVIRAL TREATMENT

62% People Living with HIV virally suppressed (Target: 73%)

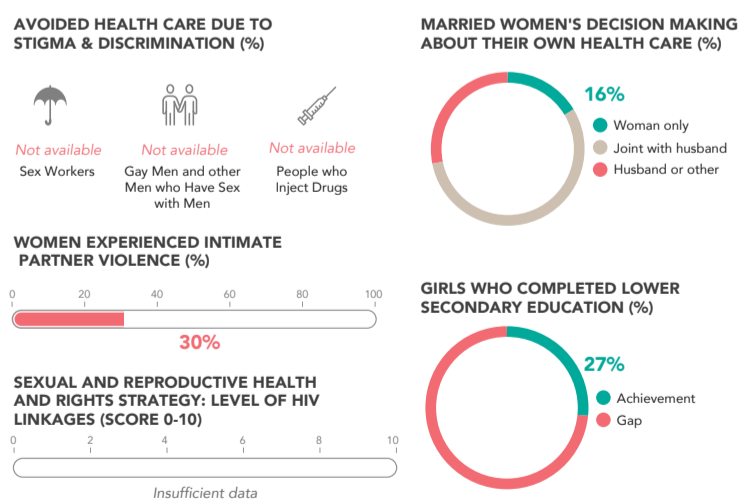

Country messages: Scale up the identification of people living with HIV, linkages to care and treatment adherence.

Score: 6

NEXT STEPS:

- > Engage, mobilize, advocate and promote the HIV primary prevention agenda at all levels as an essential component to achieve epidemic control.
- > Take immediate remedial action on low scoring components of the five prevention pillars and the 10-point Road Map.
- > Strengthen civil society organizations and public-private partnerships for HIV primary prevention.
- > Advocate for increased domestic financing for the HIV response.
