

HIV Prevention Score Card - Big Picture

Select regional grouping from drop-down menu

GPC

2021

Version 2.01.

Scores are based on specific indicators and provide initial insights, not a full assessment. New infection trends and scores reflect different time periods and cannot be directly linked.

Scores							Scores							Scores							Scores

Note: 2020 and 2025 targets for reducing new HIV infections represent the country's required contribution to global targets, a 75% reduction by 2020 and 82.5% reduction by 2025 against 2010 as a baseline. These reductions are required to achieve a 90% reduction by 2030.
