The number of people newly infected with HIV declined from 27000 in 2010 to 12000 in 2020, a 56% decline.

**HIV prevalence**

- **2010**: 27 000
- **2020**: 12 000
- **2020 baseline**: 4 700

Data sources key populations coverage: Global Aids Monitoring 2021, Global Fund and PEPFAR reports obtained in 2021

Adopted multi-month dispensing

**Voluntary medical male circumcision**

- **2010**: 22%
- **2020**: 51%

**Prevention of vertical transmission of HIV**

- **MTCT rate (2020)**: 15%

**MTCT rate (2020):**

- **% of HIV-positive pregnant women receiving ART (2020):** 92%
- **Number of estimated births to women living with HIV (2020):** 19 000
- **Number of new child infections due to vertical transmission (2020):** 2 800

**Distribution of new child infections in 2020**

- % of child infections because mother acquired HIV during pregnancy or breastfeeding:
  - % of child infections because mother did not receive antiretroviral treatment during pregnancy or breastfeeding:
  - % of child infections because mother was on antiretroviral treatment during pregnancy or breastfeeding, but was not virologically suppressed:

**HIV programme coverage and outcomes**

- **Condom use at last sex with a non-regular partner, 15–49 years (%):**
  - Women: 98%
  - Men: 95%

**Pre-exposure prophylaxis**

- **Number of people sexually active, using PrEP at the end of 2020:** 1 000
  - Men: 750
  - Women: 250

**Antiretroviral treatment**

- **Number of people living with HIV virally suppressed (%):**
  - Adults: 78%
  - Children: 92%

**HIV prevention adaptations during COVID-19**

- **Safe continuation of outreach**
  - **Young women Key populations:** Yes
  - **Condoms**
    - **PEP (PrEP) treatment:** Yes
    - **HIV treatment:** Yes
  - **Safe injecting equipment**
    - **Optimal substitution therapy (take-home dosages):** Yes

**Policy and structural barriers**

- **Criminalisation of the behaviour of key populations**
  - Yes
  - Gay men & other MSM
  - People who inject drugs
  - Transgender people
  - Prisoners

- **The national strategy includes critical elements of the programme package for key populations**
  - ID
  - ID
  - No

- **Avoided health care because of stigma and discrimination**
  - ID
  - ID
  - No

- **Population size**
  - 15–24 years: 85 000
  - 15–49 years: 100 000

**Adolescent girls and young women**

- **Proportion of women who experienced intimate partner violence**
  - 20%

- **Girls who completed lower secondary education**

- **Policies on life skills-based HIV and sexuality education (secondary schools)**

- **Laws requiring parental consent for adolescents to access HIV testing services, age of consent**

**Voluntary medical male circumcision**

- **Uptake of voluntary medical male circumcision (VMMC) (70% of targets achieved)**

**Pre-exposure prophylaxis**

- **Number of people sexually active using PrEP at the end of 2020:** 1 000

**Antiretroviral treatment**

- **Number of people living with HIV virally suppressed:**
  - Adults: 78%
  - Children: 92%

**HIV prevention adaptations during COVID-19**

- **Safe continuation of outreach**
  - **Young women Key populations:** Yes
  - Condoms
    - **PEP (PrEP) treatment:** Yes
    - **HIV treatment:** Yes
  - **Safe injecting equipment**
    - **Optimal substitution therapy (take-home dosages):** Yes

**Linkages between HIV and sexual and reproductive health services**

- **HIV testing services integrated within sexual and reproductive health**

- **Provider-initiated condoms promotion integrated into sexual and reproductive health services**

**Data sources:**

- UNAIDS 2021 epidemiological estimates; Global AIDS Monitoring 2021; and ICF – the DHS Program STATcompiler.

**Notes:**

- *Note:* Data are insufficient to meet reporting requirements. More country-specific estimates are needed to more closely approximate estimates presented or other studies may need to be undertaken over several years after the surveys were conducted.

**2020 and 2025 targets represent the country's required contribution to global targets, a 75% reduction by 2020 and 82.5% reduction by 2025 against 2010 as a baseline.**

**Policy and structural barriers**

- **Criminalisation of the behaviour of key populations**
  - Yes
  - Gay men & other MSM
  - People who inject drugs
  - Transgender people
  - Prisoners

- **The national strategy includes critical elements of the programme package for key populations**
  - ID
  - ID
  - No

- **Avoided health care because of stigma and discrimination**
  - ID
  - ID
  - No

- **Population size**
  - 15–24 years: 85 000
  - 15–49 years: 100 000
