**Key populations**

- **Sex workers**
  - Condom use at last paid sex (%) - Target 90%

- **Gay men and other men who have sex with men**
  - Condom use at last paid sex (%) - Target 90%

- **People who inject drugs**
  - Condom use at last paid sex (%) - Target 90%

**Pre-exposure prophylaxis**

- Number of people actively taking Pre-Exposure Prophylaxis (PrEP)

**Antiretroviral treatment**

- People living with HIV on ART as a percentage of people who report being virally suppressed

**Key populations**

- **Sex workers**
  - Condom use at last paid sex (%) - Target 90%

- **Gay men and other men who have sex with men**
  - Condom use at last paid sex (%) - Target 90%

- **People who inject drugs**
  - Condom use at last paid sex (%) - Target 90%

**Pre-exposure prophylaxis**

- Number of people actively taking Pre-Exposure Prophylaxis (PrEP)

**Antiretroviral treatment**

- People living with HIV on ART as a percentage of people who report being virally suppressed

**HIV prevention adaptations during COVID-19**

- Safe continuation of outreach
  - Overall level: Very low
  - Key populations: No
  - Condoms: No
  - Antiretroviral treatment: No
  - Safe injecting equipment: No
  - PrEP: No

**HIV prevention adaptations**

- Provider-initiated condom promotion integrated into sexual and reproductive health services

**Linkages between HIV and sexual and reproductive health services**

- HIV testing services integrated within sexual and reproductive health
