

The State of HIV Prevention in Ukraine

2021

The number of people newly infected with HIV declined from 12000 in 2010 to 9300 in 2020, a 21% decline.

Policy and structural barriers

Key populations

	Sex workers	Gay men & other MSM	People who inject drugs	Trans-gender people	Prisoners
Criminalization of the behaviour of key populations	Yes	No	Yes	No	na
The national strategy includes critical elements of the programme package for key populations	All	All	All	id	Some
Avoided health care because of stigma and discrimination	16%	10%	10%	8%	na
Population size	86 600	179 400	350 300	8 200	48 700

HIV prevention adaptations during COVID-19

	Safe continuation of outreach	Online counselling
Key populations	No	No
Adopted multi-month dispensing	Yes	Yes
Condoms	No	No
PrEP	Yes	Yes
HIV treatment	Yes	Yes
Safe injecting equipment	No	Yes
Opioid substitution therapy (take home dosages)		Yes

Note: 'Yes' refers to the adaptation having been introduced (not necessarily it being universally available).

Linkages between HIV and sexual and reproductive health services

HIV testing services integrated within sexual and reproductive health	Yes
Provider-initiated condom promotion integrated into sexual and reproductive health services	No/Id

HIV programme coverage and outcomes

KEY POPULATIONS

Sex workers

Condom use at last paid sex (%)

Target 95%

Sex workers: 94, Clients: 84

Received two prevention interventions in past 3 months (%): 57

Score: 7

Gay men and other men who have sex with men

Condom use at last anal sex (%)

Target 90%

Gay men and other men who have sex with men: 78

Received two prevention interventions in past 3 months (%): 28

Score: 5

People who inject drugs

Use of harm reduction services (%)

Target 95%

With safe injections: 97, On opioid substitution therapy: 5

Received two prevention interventions in past 3 months (%): 13

Score: 7

ANTIRETROVIRAL DRUG-BASED PREVENTION

Pre-exposure prophylaxis

Number of people actively taking Pre-Exposure Prophylaxis (PrEP)

2017: 200, 2018: 125, 2019: 1735, 2020: 2258

Change in use of PrEP (July-December 2020): +30%

Score: 4

Antiretroviral treatment

People living with HIV virally suppressed

Target 73%

Women: 54, Men: 52

Antiretroviral treatment coverage

Overall: 57%, Sex workers: 29%, Men who have sex with men: 46%, People who inject drugs: 38%

Score: 6
