2022

Output (coverage)

Outcome (service use/behaviour)

Impact

ARV-based prevention			Key populations		
Composite PrEP score (0-10)			% of national PrEP need met		
Number of people who received PrEP at least once in the past 12 months			% of PLHIV virally suppressed		
% of PLHIV on ART					
Sex workers (SW)			Gay men and other men who have sex with men (MSM)		
Population size estimate for sex workers			Condom use / last paid sex (%)		
% of SWs who received at least two HIV prevention interventions (past 3 mo)			% on ART		
Prevention strategy includes core elements of SW prevention package			SWs LHIV		
People who inject drugs (PWID)			Structural barriers and enablers		
Population size estimate for people who inject drugs			% with safe injecting practices		
% of PWID who received at least two HIV prevention interventions (past 3 mo)			% on opioid substitution therapy		
Prevention strategy includes core elements of PWID harm reduction package			% on ART		
Criminalization of sex work			% of people who avoided health care because of stigma and discrimination		
Criminalization of same-sex sexual acts					
Criminalization of drug use/consumption or possession for personal use					
Criminalization of transgender people					

### New HIV infections

(ages 15+ trend vs. 2020 and 2025 targets)

Year	Infections
2010	15,000
2020	9,800
2020 Target	3,900
2025 Target	3,100

2020 and 2025 targets represent the country's required contribution to global targets, a 75% reduction by 2020 and 82.5% reduction by 2025 against 2010 as a baseline.

### HIV prevalence

Group	Prevalence
Sex workers <25 years	3.7
Sex workers all ages	8.3
MSM <25 years	5.5
MSM all ages	8.8
PWID <25 years	17.1
PWID all ages	19.0
Women 15-24	0.4
Men 15-24	0.3
Adults, 15-49	0.6

### Summary Scores

Sex workers	6
MSM	4
PWID	8
ART	7
PrEP	id
